**Subject:** Olam Firebaugh Tentative WDR comment

Denise,

I have an additional comment regarding the Olam Firebaugh tentative WDR. The tentative WDR states that the salinity management plan must be submitted 120 days from adoption of the Order, but the plant does not discharge in the winter, so no flow data will be available until after May 2014. Since the salinity management plan requires measuring salinity at different points in the process water system during normal plant operations, I am requesting that Provision F. 12 be amended to read the Salinity Management Plan is due 120 days following first discharges under the new permit (approximately May 2014).

If there are any questions or you need additional information please let me know.

Thanks,

Rick Harker
